

HEAVY STRUCTURAL CONCRETE

Structural concrete is the foundation of C.A. Murren. In the earliest days of the company, concrete was the focus of our work. From those small projects we've grown to be a leader in the industry. At the completion of the Dulles Fuel Tank Farm in 2008, its tank foundations and containment walls had consumed over 20,000 cubic yards of concrete.

C. A. Murren's extensive history in structural concrete includes:

- Ball Mill Foundations
- Bridges
- Parking Garages
- Building Foundations
- Fuel Storage Tank Foundations
- Water & Sewer Treatment Plants
